## PROFESSIONAL SUMMARY

---

Motivated BCA (AI & ML) student at Izee Business School (Bangalore University) with hands on experience in machine learning, data science, and real-world AI projects. Skilled in Python, Scikit-learn, and data analysis, with a strong focus on building scalable AI solutions and monitoring systems. Quick learner with a proven ability to apply technical concepts to practical problem-solving. Eager to contribute to software engineering and AI-focused roles in a collaborative tech environment.

## EDUCATION

---

|                     |                                                                                                                                                                                                  |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>2023–Present</b> | <b>Bachelor of Computer Applications (BCA) - AI &amp; Machine Learning</b><br>Izee Business School, Bangalore University, Karnataka<br><i>Current Year: 3rd Year (Expected Graduation: 2026)</i> |
|---------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## INTERNSHIP EXPERIENCE

---

|             |                                                                                                                                                                                                                                              |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>2025</b> | <b>Data Science Intern</b><br>Worked on comprehensive data analysis and machine learning tasks. Gained hands-on experience in data preprocessing, visualization, and model building using real-world datasets to derive analytical insights. |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## PROJECTS

---

|             |                                                                                                                                                                                                                                                         |
|-------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>2025</b> | <b>Fish Farm AI System (ITSNOC Project)</b><br>Developed an AI-based system for monitoring and improving fish farming efficiency. Used Python and Machine Learning concepts for predictive analysis, focusing on real-world industrial problem-solving. |
| <b>2024</b> | <b>Titanic Survival Prediction</b><br>Built a predictive ML model using Python and Scikit-learn. Performed extensive data cleaning, feature engineering, and evaluation to achieve high accuracy using classification algorithms.                       |

## TECHNICAL SKILLS

---

- **Programming Languages:** Python, JavaScript
- **AI/ML:** Machine Learning, Data Analysis, Model Building, Scikit-learn
- **Web Development:** HTML, CSS, Basic JS,
- **Tools & Libraries:** Pandas, NumPy, Jupyter Notebook, Git, GitHub

- **Cloud Infrastructure development:** AWS cloud

## **SOFT SKILLS**

---

- Problem Solving & Analytical Thinking
- Quick Learning & Adaptability
- Team Collaboration
- Effective Communication

1

## **LANGUAGES**

---

- English (Proficient)
- Malayalam (Native)
- Hindi (Conversational)

## **INTERESTS**

---

- AI Research & Development
- Software Engineering
- Scalable System Design
- Continuous Learning
